

VISION

To become a globally recognized association for certification of practicing engineers.

MISSION

Based on engineering first principles and practical real world applications, our curriculum has been vetted by academic and industry professionals. Through rigorous study and examination, candidates are able to prove their knowledge and experience. This body of certified professional engineers will become a network of industry professionals leading continuous improvement and education with improved ethics.

KNOWLEDGE
CERTIFICATION
NETWORKING

This program requires specific combinations of knowledge and experience, as well as successful demonstration of safety competency through examination. Those who hold these certifications must continue to prove competency to maintain the credential they have earned with two hours of continuing education per year.
