

**Education**                                      **Chemical Engineering**  
**University**                                      **17 Agustus 1945 University**  
**University Location**                       **Semarang, Central Java, Indonesia**  
**Date CPE1 Awarded**                       **27 February 2017**

### **Summary**

My full name is Nur Riyati, my nick name is Riya. I was born in Riau, 6 February 1998. I am the second child of two. My father work as a farmer and my mother as a housewife. I live in Desa Bukit Jaya, kecamatan Ukui Kabupaten Pelalawan, Riau Province. Currently I stay in Semarang kecamatan Ngaliyan, to continue my education. Even I was came from Riau Province, but I am Javanese because both of my parents are Javanese. I am moslem and my hobby is drawing.

For my educational background, I was study at elementary school on my age 6 at SDN 005 Ukui, it was located close to my house. After graduated from elementary school, I continue my study at SMPN 04 Ukui, the school was side by side with my elementary school. After junior high school graduated , I went to Pekanbaru city to continue my study at MA Ummatan Wasathan Pondok Pesantren Teknologi Riau and the school location was far enough from my house. I was graduated in 2016 and than I continue my study at Universitas 17 Agustus 1945 Semarang. I was failed the test to enter Public school through SNMPTN dan SBMPTN for chemical engineering and chemical FMIPA. But now, I am part of chemical engineering student of UNTAG Semarang, and I am study in my interested subject.

The reason I choose chemical engineering, it because when I was in junior high, that time was social science subject lesson, study about atmosphere and my teacher told us that we have depleting ozone layer now. That time I have an idea how to make equipment that can produce a substance that can restore the ozone on earth. It may be a silly idea but that was my story. The other reason is because I like chemistry and I want to be a chemist or chemical expert and an engineer. I think that 2 profession have an important role in current life because in every part of our life we always use this chemical from the smallest thing to something that have big advantage. I hope I could be a Chemist or an Engineer that can be useful for Indonesia people and country.

### **Training**

1. November 15, 2016 to February 27, 2017

Certified Practicing Engineer Level 1 (CPE 1 - International Association of Certified Practicing Engineer)

2. December 11, 2016

Chemical Engineering Software training “ Simulation Process And Heat Exchanger Design”
